

ABSTRACT OF THE DISCLOSURE

DYE-FORMING COUPLER, SILVER HALIDE
PHOTOGRAPHIC LIGHT-SENSITIVE MATERIAL
5 AND AZOMETHINE DYE COMPOUND

A dye-forming coupler and compound of formula (I):

formula (I)

wherein Q represents a residue that forms, together with -N-C=N-, a nitrogen-containing 6-membered ring; R_A represents an aryl, heterocyclic, or -(R₁)_r-(R₄)_m group; X represents an aryl group; Y represents a hydrogen atom, or a group capable of being split-off upon a coupling reaction with an oxidized product of a developing agent:

wherein,

when R_A represents an -(R₁)_r-(R₄)_m group, R₁ represents a methylene group, a methine group, or a carbon atom; r is 1 to 30; R₄ represents a substituent except for a hydrogen atom; m is 1 to 30; and the -(R₁)_r-(R₄)_m group does not represent a straight-chain alkyl group.
